Automation

Hello Connections

Greetings From "Codersbrain Technology Pvt Ltd"

We are hiring for "QA Automation Engineer."

Interested resources can share their resume at hemant.agrawal@codersbrain.com / babita@codersbrain.com / Shiromani.singh@codersbrain.com

Experience: 8 – 12 years
Notice Period: Immediate to 10 days max.
Location: From Office - Pune/Chennai/Trichy
Note: No Hyderabad/Telangana/AP/JNTU/Nagarjuna profiles

Skills Required:
Automation Framework Design, Playwright (expert) with Typescript or Javascript

Job Description:

 Key Responsibilities:

Design and implement a Declarative State API Framework for Intent-based Networking in the Telecom Industry.
Collaborate with architects, product managers, and other stakeholders to define requirements and system architecture.
Develop clean, efficient, and maintainable code in Java.
Ensure code quality through unit testing, code reviews, and continuous integration.
Optimize software performance and scalability.
Troubleshoot and debug issues to ensure smooth operation in production environments.
Stay updated with emerging technologies and industry trends relevant to intent-based networking and telecommunications.

Skills Required:

Strong proficiency in Java programming language.
Experience with software development methodologies, such as Agile or Scrum.
In-depth understanding of intent-based networking concepts and principles.
Knowledge of declarative programming paradigms and state management.
Proficiency in designing and implementing RESTful APIs.
Experience with distributed systems and microservices architecture.

Solid understanding of data structures, algorithms, and software design principles.
Ability to work collaboratively in a fast-paced environment.
Excellent problem-solving and analytical skills.
Effective communication and interpersonal abilities.
Preferred Qualifications:
Experience with cloud platforms.
Knowledge of containerization technologies
Familiarity with configuration management tools
Understanding of network virtualization technologies
Previous experience in developing telecom software solutions.

 Education and experience:
A Bachelor/master's degree in IT related and minimum of 7+ years' experience.
Should have experience in Automation Framework Design & Development not limited to Cucumber.
Must have 4+years of experience in Playwright with Type Script or Java Script.
Excellent knowledge and 4+ years of experience in BDD Cucumber.
Overall 6+ years of experience in CI/CD Pipeline Setup & Implementation, Sanity & Regression of pipeline, and Migration of Existing TCs.
Excellent experience with Selenium Java, J Meter and Load Runner preferred.
Expert in automation frameworks such as JUnit, TestNG, Selenium UI and/or API level test automation.
